

ULTRASOUND EXAM ROOM VISITOR POLICY

THE FOLLOWING POLICIES HAVE BEEN ADOPTED TO ENSURE THE HIGHEST QUALITY ULTRASOUND EXAMS POSSIBLE.

1. Observation by family and friends:

- We cannot allow unsupervised children under the age of 12 in the exam room or in the lobby. We do, however, provide flexible weekend and evening appointments.
- Only the patient will be allowed into the exam room during ultrasound exams, with the exception of OB, minor patients, care givers or interpreters.
- During Obstetrical ultrasounds, a maximum of two adults will be allowed in the room during the exam.

2. Other Issues:

- Cameras and camcorders are extremely distracting and are not allowed in the room during the exam.
- Patients who are pregnant will be given some complimentary photos of their baby. Entertainment DVD's are no longer available. Official copies of your exam can be requested for small fee and will be available 48 hours after the completion of your test.
- Cell phone use is not allowed in the exam rooms.

Ultrasound is an extremely user dependent imaging modality and requires a high degree of concentration with a minimum amount of distractions desired. Providing quality medical care with the best possible patient experience remains our goal. Because of our mission, the preceding policies have been adopted. Thank you for your cooperation.
